

Action plan submitted by filiz deniz for Kdz. Ereğli Saniye Erdoğan Anaokulu - 28.12.2022 @ 11:18:48

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

## Infrastructure

### Technical security

- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.
- › Although asking users to define their own filtering is a good way to encourage responsible use, most school-aged pupils are not mature enough to make an informed decision about the level of filtering they should be using. The school, or at the very least the teacher, needs to decide on what level of filtering is used. This can be done after discussion with the class to make them aware of the reasons for any filter that is installed. Pupils' parents would typically prefer that filtering is set by the school or teacher as young people are often not aware of what they could come across by accident, whether potentially harmful or illegal. However, an educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See [www.europa.eu/youth/EU\\_en](http://www.europa.eu/youth/EU_en) for examples of discussions that can take place in the classroom on this topic, through role-play and group games.

### Pupil and staff access to technology

- › Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.

### Data protection

- › It is good that your school records are stored in a safe environment, it is also necessary that they are archived and disposed with in line with the Data Protection Act. Ensure that a good records management system is put in place. Check the according fact sheet for more information.
- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are

regularly reviewed to ensure they are in line with the state of the latest technology.

- › It is good that your email system is protected and that you have a policy for the transfer of pupil data in place. In this regard, it is important to draw up guidelines so that all staff are clear about what to do if they discover inappropriate or illegal content on school machines. For further information see the fact sheet on Protecting sensitive data ([www.esafetylabel.eu/group/community/protecting-sensitive-data-in-schools](http://www.esafetylabel.eu/group/community/protecting-sensitive-data-in-schools)).

## Software licensing

- › Compliance with licensing agreements is important. Someone needs to have overall responsibility to ensure that this is happening and that all licenses are valid for purpose. Staff should be briefed on who is the person responsible.

The [End-user license agreement](#) section in Wikipedia will provide useful information for understanding terms and conditions and comparing software agreements.

- › It is good practise that the member of staff responsible is fully aware of installed software and their license status.

## IT Management

- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.
- › Once a year decisions on new hard/software are made. Investigate ways to also allow for new hard/software requests throughout the year. It will allow teachers to create a more engaging lesson without the temptation of unauthorized copying and its inherent dangers and costs.

# Policy

## Acceptable Use Policy (AUP)

- › This is good teaching practice, but you need to consolidate it with a section dedicated to mobile phone usage in your School Policy and your Acceptable Use Policy. Consult all stakeholders to develop this; the fact sheets on Using mobile phones at school ([www.esafetylabel.eu/group/community/using-mobile-device-in-schools](http://www.esafetylabel.eu/group/community/using-mobile-device-in-schools)) and School Policy ([www.esafetylabel.eu/group/community/school-policy](http://www.esafetylabel.eu/group/community/school-policy)) will provide helpful information.
- › It is good that you have an Acceptable Use Policy (AUP) for pupils. You should now amend the AUP to include staff and the wider community. To ensure that your revised AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at [www.esafetylabel.eu/group/community/acceptable-use-policy-aup-](http://www.esafetylabel.eu/group/community/acceptable-use-policy-aup-).
- › School policies and procedures are essential to ensure a smooth operation within a school and that all school members follow the same set of rules and guidelines. Ensure that school policies exist and that all school members are aware of them. You can find more information on this in the of the eSafety Label website.

## Reporting and Incident-Handling

- › It is a pity not to share the details and solutions applied to bullying incidents both with the staff members and via the eSafety Label incident handling form. Only in this way can you learn through experience and the successful incident handling practices of others. You should also make sure that anti-bullying guidelines are given to pupils and staff in your Acceptable Use Policy.
- › Have teachers received training on dealing with potentially illegal material? Is the procedure clearly indicated in the School Policy and the Acceptable Use Policy which all teachers and pupils have signed? All staff and pupils should be aware that they should report any suspected illegal content to the national INHOPE hotline ([www.inhope.org](http://www.inhope.org)).

## Staff policy

- › New technologies, such as smartphones or other mobile devices bring a new set of risks with them. Ensure that your teachers are aware of those. This way they can avoid the pitfalls when using the devices and also pass the knowledge onto the pupils.
- › Ensure that all staff understand the school's regulations on use of personal mobile devices in the classroom; these should be clearly communicated in the School Policy. Monitor the effectiveness of the policy and ensure that it is adhered to. You can also advise your staff to read the fact sheet Using mobile phones at school ([www.esafetymlabel.eu/group/community/using-mobile-device-in-schools](http://www.esafetymlabel.eu/group/community/using-mobile-device-in-schools)).
- › In your school user accounts are managed in a timely manner. This is important as it decreases the risk of misuse.

## Pupil practice/behaviour School presence online

- › Review the policy on taking photographs of, and by, pupils, parents and staff and check that it reflects any recent developments. Ideally, the policy should focus on behaviour rather than specific technologies. The fact sheet on Taking and publishing photos and videos at school ([www.esafetymlabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school](http://www.esafetymlabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school)) will provide a good starting point.
- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.

# Practice

## Management of eSafety

- › It is good that the job description outlines that the member of staff responsible for ICT needs to keep up to date with new technologies. In addition, it would be good to regularly send the ICT responsible to trainings/conferences so (s)he can keep up with new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.
- › Ensure that the governor or board member appointed for eSafety has the opportunity to receive regular training and also to ensure that colleagues are aware of eSafety issues. Involve your governing body in the development

and regular review of your School Policy. See our fact sheet on School Policy

[www.esafetylevel.eu/group/community/school-policy](http://www.esafetylevel.eu/group/community/school-policy).

- › It is good that you have a designated member of staff responsible for eSafety. Consider whether it would be helpful to have an eSafety committee comprising members from all groups of stakeholders. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at [www.esafetylevel.eu/group/teacher/incident-handling](http://www.esafetylevel.eu/group/teacher/incident-handling).

## eSafety in the curriculum

- › It is good that these issues have been included in the eSafety curriculum. It is a good idea to regularly review the issues which are being covered by your eSafety education in order to ensure that new and emerging issues are covered.
- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at [www.esafetylevel.eu/group/community/embedding-online-safety-in-curriculum](http://www.esafetylevel.eu/group/community/embedding-online-safety-in-curriculum).
- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).

## Extra curricular activities

- › Try to develop further the engagement of pupils in peer mentoring and provide them with more opportunities to share their thoughts and understanding with their peers. Also check out the resource section of the eSafety Label portal to get further ideas and resources.

## Sources of support

- › There is a school counselor in your school though not trained on eSafety issues. Investigate if there is a training course that this teacher could follow in order to be better equipped to help pupils dealing with issues related to new media.
- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.
- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at [www.esafetylevel.eu/group/community/information-for-parents](http://www.esafetylevel.eu/group/community/information-for-parents) to find resources that could be circulated to parents and ideas for parent evenings.

## Staff training

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
